cleaning machine,  
equipment and tools

# FREEZETECH

FreezeTech dry ice blasting is an effective and cost efficient way to maximize production capability and product quality. This dry ice blasting process is safe, non-abrasive and non-conductive.

FreezeTech is only one dry ice blasting machine that has various capacities. It can produce dry ice particles in different sizes to make most efficient cleaning by striking onto the top layer with higher kinetic energy. Upon impact, the small granular will eliminate the mass in all tighter areas.

With our pioneer and continuous development, we have started from creating and producing the spare parts of dry ice machines to serve various kinds of customers' needs. With our long experience in meeting the needs of our customers, our service was born with the new type of dry ice blasting machine.

# FREEZETECH

FreezeTech dry ice blasting is designed to use the cheap dry ice in block form which can keep longer than other dry ice form. With two hose system, the blast air and dry ice is separated. It reduces dry ice delaminating for more than 50% with 8 meter long of blasting hose.

**SAFETY**

FreezeTech dry ice blasting have been designed to be controlled by pneumatic system only. It is out of electrical danger, and with interlock system, you can avoid accident from unintentional function with a ground wire and caution warning for safety alert.

Our Patent : "Apparatus to provide dry ice granular in different particle size for dry ice blasting machine" give our dry ice blasting machine have an more advantageous.

Choice the model matching you need.

	F90	F80
Size ( L x W x H ) mm	720x540x920	690x490x890
Hopper capacity, kg	15	10
Variable feed rate	0.8-3.0	0.4-2.0
Blast pressure range	3 to 9 bar	2 to 9 bar
Air consumption, cfm	190	125
Weight, kg	135	94

Which one is your application
